

SO2 session 16 - lecture  
2 system calls

System calls # function call  
In the Reality we prepare for  
interruption with use of  
assembly

With gdb the user space  
application :  
1) save the parameter in stack  
2) writing in the register of cpu  
3) interruption  
4) kernel save all  
5) syscall handler { nr }
